

LICENSE & DISTRIBUTION RIGHTS

AEGIS AGENT / AUTHOR STATEMENT / APACHE LICENSE 2.0

I am Amin Azimi, AI Architect and developer of Aegis Agent. I publish this statement to describe the license text currently present in the project repository, while clearly distinguishing its permissions from the editorial issues I identified in that file.

01 | LICENSE IDENTIFICATION

The repository LICENSE file identifies Apache License, Version 2.0 and includes the standard nine-section structure and appendix. The copyright header names Amin Azimi and Azimi Innovation Lab. The license file itself is the controlling source to inspect; this two-page document is a summary, not a substitute for its full terms.

02 | PERMISSIONS AND CONDITIONS

Apache-2.0 is a permissive open-source license. Subject to its terms, recipients may use, copy, modify and distribute covered material, including in commercial contexts. Redistribution requires retaining applicable notices, providing a copy of the license and marking modified files. The license also contains a conditional contributor patent grant, warranty disclaimer and limits on trademark permission.

03 | RIGHTS AND AUTHORSHIP

I retain my authorship and applicable copyright interests while granting the permissions stated by the license for covered work. Apache-2.0 does not mean that every brand asset, third-party dependency or unrelated product is automatically covered. Any separate rights and third-party licenses require their own review.

04 | REPOSITORY TEXT QUALITY

The current LICENSE file includes an introductory note discussing a previous MIT / “All rights reserved” conflict. It also contains duplicated wording in its redistribution section and typographical irregularities elsewhere. I therefore do not represent the repository copy as an error-free reproduction of the canonical Apache-2.0 text. Legal and editorial cleanup remains a separate repository task, requiring owner authorization.

SOURCE OF TRUTH
